## MEANTIME COFFEE PORTER

2006 WORLD BEER CUP GOLD MEDAL

Whilst we wouldn't recommend having this at breakfast with your bacon and eggs, our Coffee Beer is made with real coffee and has a caffeine hit to match. The natural flavours of the beans selected and hand roasted by our friends at the Union Coffee Roasters go well with the roast barley in the beer to give a silky-smooth drink with distinct chocolate and vanilla notes. Our first formulation of this beer was the first UK brewed beer to carry the Fairtrade logo, and although we have reformulated it to create an even better blend of malt and roast coffee flavours we can no longer get enough coffee in each bottle to qualify for Fairtrade status. We are still using the same Fairtrade Araba Bourbon beans from Rwanda's Abuhuzamugambi Cooperative.

At the Meantime Brewing Co we love flavour, so it wasn't exactly difficult for us to see how the scents and aromas of coffee and barley would create a perfect match like just like mint and lamb, toffee and banana, peaches and cream, peanut butter and jam. Serve lightly chilled with as many chocolate truffles as your conscience allows.

- Each serving is equal to one cup of coffee
- Available in 24/33cl bottle
